

# Fencing Data Sheet

## Paramesh Deco

Trifen Engineering is a UK stockist for Paramesh Deco welded security mesh. Deco is a popular style of welded mesh fencing with an innovative and unique appearance.

It is the perfect choice where security is required but without an intimidating and oppressive appearance. It's sophisticated good look is particularly suitable for use in prestige locations where visual appearance is essential.

The Deco range benefits from a "V" profile pressed into the panel design offering additional strength and rigidity. The added benefit of the pressed "V" profile provides additional security in areas with an increased risk of vandalism.

The Deco specification utilises 6mm diameter galvanised wire with horizontals spaced at 200mm and 4mm diameter galvanised wire with verticals at centres ranging between 20mm and 43mm to form the unique Deco panel pattern.

The panel to post fixing is achieved by using steel fixing brackets and M8 tamper-proof bolts, making the installation of panels a fast and simple process.
